JOSHUA HOTAMA

CURRICULUM VITAE

PROFILE

I am a student who studies to improve my skills, namely, hard skills and soft skills. For me having a good attitude is the most important thing because with that we can enter the world of work with the best of ourselves.

SKILLS

I have experience working individually and working with a team. I can create **wireframing** to start working on a project and can make the **wireframing** into a **prototype**. I have both **front-end** and **back-end** experience. I've been working with distributed teams using Github.

Software and programming language that I'm familliar with:

- Figma
- MICROSOFT OFFICE
- CANVA
- Notion
- HTML & CSS
- Javascript
- jQuery
- Java
- PHP
- MY SQL
- Mongo DB
- MERN Stack
- C#
- R
- Python
- Kotlin
- ERP
- NET

EDUCATION

Multimedia Nusantara University

August 2021 - July 2025

Bachelor of Information Technology

During my studies, I learned web programming, which includes web development, computer networks, internet technologies, network and internet security, programming language concepts, artificial intelligence algorithms, and human-computer interaction concepts. I graduated with a GPA of 3.59.

WORK EXPERIENCE

PT. Cermai Makmur Abadi International

IT Intern — July 2024 - December 2024

Creating Cermai Shop, which functions to view stock, as well as manage orders and payments made within the website, similar to typical online shops using Laravel. Studying ERP and demonstrating it from the establishment of the company. Maintaining the KITEC website to be used by Bea Cukai for recording goods imported for export purposes, using .NET Framework.

PT. Kalbe Farma

Front End, Backend, & UI/UX (Intern) — February 2024 - June 2024

Created several projects to increase input efficiency using MERN Stack and Laravel. Creating a website for machine scheduling in the production department for 1 week or 8 days. In addition, there is also Preventive Maintenance (PM) used by engineers to add maintenance schedules for a full month.

PROJECT EXPERIENCE

Elearning-Ku Website (elearningku.online)

February 2025 - July 2025

Full Stack Developer & Algorithm Designer

Developed eLearningku.online a full-stack e-learning platform implementing an Intelligent Tutoring System (ITS) combined with a Bayesian Network model. The system delivers core e-learning features such as course materials, assignments, and quizzes, while automatically analyzing student performance over four tasks in a semester. Based on error analysis, it generates personalized additional assignments with adaptive difficulty distribution (easy, medium, hard) calculated using Bayesian posterior probabilities. This approach ensures targeted remediation by adjusting question difficulty according to each student's learning needs.

Project Chamberlain

August 2023 - December 2023

Front End Android Studio & UI/UX

Created a front end and designed an Android application called chamberlain, used for organizations at universities that have a fine system, all fines are recorded there and can be saved if you still need it.

Project The Struggles

August 2023 - December 2023

Game Developer

Creating an FPS game using Unity. I made a map set in a hospital, the hospital is a maze so players have to find their own way out using the weapons that have been prepared while being careful because there will be zombies chasing the player.

Medang Lestari

February 2023 - Sept 2023

Backend of Medang Lestari Project

Backend responsibility for the entire website from the admin or website user. To enter input such as reports and reports, the function is to save several images at once, using different database tables and then calling them into 1 file which will be generated in PDF. The purpose of this website is to make it easier to create reports so that security does not need to send them manually.

Project Website OMB (Orientasi Mahasiswa baru)

Front End & UI/UX

February 2023 - September 2023

An information website used for new students entering the new world of college. This information is made in the form of a website that is pleasing to the eye and has a tap tap game.

Cendana Motor

August 2022 - December 2022

Backend of Cendana Motor Project

Working on the backend for the website which functions as a monitor from admin to user. This input system is carried out by the admin and will be visible to the user, has a security system for logging in and registering (only for admins).

Project UMN Life & 7Days

February 2022 - June 2022

Front End

A website that functions as a university introductory game website using javascript. This game is made like a college student from actually entering until the end of the semester when the game is finished. But to complete the game there are several bars that must be maintained and everything must be balanced. There is a button that must be clicked and when the button is clicked it will affect other bars and also affect the clock.

ORGANIZATION

Live In to Tenjo

January 2020 - April 2020

Head of Live In PKBM Alfa Omega

Responsible for the preparation for the event of 1 week at Tenjo. Collect money by selling used clothes and selling fruit chips so we can go to Tenjo for 1 week.

Orientasi Mahasiswa Baru (OMB)

February 2022 - September 2022

Person In Charge (PIC)

New student orientation is the initial activity when entering Multimedia Nusantara University. I am the PIC of the group that guides new students through the beginning of their studies, such as getting to know each other and getting to know the campus environment.

Lions Cup

August 2022 - December 2022

Lions Cup Equipment Division (Badminton)

Providing goods and equipment that will be used to compete at Multimedia Nusantara University in badminton matches.

Himpunan Mahasiswa Informatika (HMIF)

Creative division

November 2022 - December 2023

Creative division of Informatics Student Association to handle design / photography. Create web designs and designs for social media.
